

Mobile Alert

Introducing the CodeRED Mobile Alert App.

Designed to keep citizens informed and aware, no matter where they are, the CodeRED Mobile Alert App taps into the national CodeRED® Emergency Notification System and alerts subscribers located within the reach of a given notification. The App tracks a subscriber's position and sends a push notification if an alert is issued for the area.

Reach people in your jurisdiction whether they reside there or are just passing through.

With communities nationwide subscribing to the CodeRED Emergency Notification System, citizens traveling through these areas will join the 50 million citizens already covered by CodeRED and will receive notifications directly on their mobile devices. This expands the reach of messages sent by CodeRED clients to travelers entering their jurisdictions and also protects citizens when traveling outside their local area.

National organizations used by public safety officials and police departments may use the system to send messages to targeted geographic areas.

Future uses of the CodeRED Mobile Alert App could include augmenting IPAWS as an additional Alert Disseminator to deliver Presidential Alerts, Imminent Threat Alerts and AMBER Alerts in support of the FEMA program.

Subscribers may upgrade their accounts to receive customized weather alerts based on NOAA's National Weather Service bulletins. Dozens of selectable warnings are available within the CodeRED Mobile Alert App.

Visit the App Store to download today.

The CodeRED Mobile Alert App is a sophisticated answer to the question asked by Emergency Managers nationwide, **how do we communicate with citizens in our jurisdiction who do not reside there?** The App tracks a subscriber's position and sends a push notification if an alert is issued for the area.

CodeRED Mobile Alert App subscribers have the ability to manage their alert preferences and the App adjusts based on their direct instructions.
