Describe the general condition of each of the fields your program uses in terms of maintenance, serviceability, drainage, amenities, safety, geometry, etc.: Penn Brook fields are fairly new and currently in very good shape. The baseball program pays to maintain the infield day and up keep. There are no amenities at these fields other than 1 port-a-potty. ALP has a building that houses a Women's and Men's restroom and a snack bar run by a local ice cream establishent. The turf field has port-a-potties and no other amenities.

Would additional lighted fields in your community enhance field availability? Do you feel additional lighted fields are justified? If so, which fields in particular do you recommend be lighted? Yes currently only ALP, Penn Brook Field 1 and the Turf field have lights. Additional fields with lights would accommodate a larger time span for teams to practice especially in the spring and Fall with limited daylight. A lot of times parents and volunteer coaches need to leave work early to be able to attend practices and games. Lights on Field 4 would help, but lights at any new field is a must have.

Would synthetic turf fields in your community enhance field availability? Do you feel synthetic turf fields are justified? If so, which fields in particular do you recommend become synthetic turf? It would for some sports, but not all. Turf fields are expensive to install and replace. In my opinion, the best option would be for grass fields with lights.

As the town prepares a master plan for its athletic fields, what are your program's top priority needs that should be addressed?

- 1) Additional time on fields for practice and potentially hosting a summer baseball tournament
- 2) TBall program is growing and currently we squeeze 8 teams and 4 games onto 3 fields at Penn Brook
- 3) Additional fields to accomadate the all sports needs and meet working parent/ coaches schedules

Please provide any further comments or information that may be pertinent to the athletic/recreation planning process: The biggest issue is the need for additional fields. We share all fields with all youth sports and the Turf field and Penn Brook Field 2 are shared with high school sports as well. The biggest issue is having enough space and time to practice. All the sports work together to manage the field needs of each sport.

Describe the general condition of each of the fields your program uses in terms of maintenance, serviceability, drainage, amenities, safety, geometry, etc.: West St: Unable to perform any maintenance
other than weekly in season mow and occasional watering; Penn Brook: There is a fertilizer program in place,
it is regularly watered and mowed; Littles Hill: There is no maintenance program in place other than mowing;
High school: Mowed by the school, no water available, fertilizer or other maintenance programs unknown
Would additional lighted fields in your community enhance field availability? Do you feel additional lighted fields are justified? If so, which fields in particular do you recommend be lighted? Yes, Soccer struggles in the mid-late fall with daylight.
Would synthetic turf fields in your community enhance field availability? Do you feel synthetic turf fields are justified? If so, which fields in particular do you recommend become synthetic turf?  Soccer would benefit from a truf field lined with smaller (G2, G4 and G6) field dimensions. As a personal
preference I like soccer played on natural grass, however the administration of a season is challenged as
the weather and field conditions deteriorate.
As the town prepares a master plan for its athletic fields, what are your program's top priority needs that should be addressed?
1)Large field area where multiple soccer activities could happen at the same time without coordination with other
2)Ability to maintain these fields to create lush, consistent playing surafes
3)The ability to rest fields or areas of fields to allow for grass to regrow and extend life
Please provide any further comments or information that may be pertinent to the athletic/recreation planning process: In general, soccer has done a good job over the years using what is available. The program is strong and has started to offer additional training opportunities to it's players. As those opportunities increase,

field use beyond the normal game and practice schedule will increase. Additionally we have future goals Thank you for your cooperation in completing this questionnaire.

If so, how many more teams would you fill given unlimited space? 0
Are there out-of-season workshops or clinics that require field space?: Explain type, number and dates what venue is used and time used per day: No. But if there was more access to fields, there may be an oppurtunity to create something

To the best of your ability please complete the below schedule for your agency/sport. The Field Venue refers to the field site (e.g., High School) and the Field No./Name refers to the specific field at the venue.

Season 1: Start Date:	8/20	End Date:	11/22

		Timeframe for games/practices (e.g., Mon 5pm-9pm, Wed 3pm-7pm)							
Field Venue	Field No./Name	Sun.	Mon.	Tues.	Wed.	Thurs.	Fri.	Sat.	
High School	Turf	8-12	2-6	2-6	2-6	2-6	2-10	8-12	
High School	Upper 1	X	2-5	2-5	2-5	2-5	2-5	х	
High School	Upper 2	х	2-5	2-5	2-5	2-5	2-5	х	
Perley	Perley	8-12	2-5	2-5	2-5	2-5	2-5	х	

Season 2: Sta	art Date:	3/28	_ End Date	:5	/30			
		Timefran	ne for game	es/practice	s (e.g., Mor	5pm-9pm,	Wed 3pm-7	7pm)
Field Venue	Field No./Name	Sun.	Mon.	Tues.	Wed.	Thurs.	Fri.	Sat.

As the town that should b	prepares a ma e addressed?	ster plan fo	r its athlet	ic fields, w	/hat are yo	ur program'	's top priori	ity needs
1) More Access	s to Turf							
2) Parking and	Seating							
3)								
Please provid	e any further co	omments or elds at the hi	information	on that may	y be pertine chance to re	ent to the at st and are pla	hletic/recre	ation eather

Please provide any further comments or information that may be pertinent to the athletic/recreation planning process: The grass fields at the high school never have a chance to rest and are played in all weather conditions. There needs to be MORE fields added, not just replacing an exisiting field. It is the number of fields available, rather than the overall quality of fields. More fields = More Rest = Better Quality
